AllTheWeb.com [Breaking news from 3,000 sources running FAST real-time search technology]
Web
http://www.alltheweb.com/
> Catalogs news all day at a rate of 800 articles/minute.

Callaghan, Dennis
Search Tools get Smarter; apps to offer more complete results
1p. eWeek 04/21/2003
Web
http://www.eweek.com/article2/0,3959,1036647,00.asp
> Reviews new releases of iPhrase, and Ask Jeeves, as well as Endeca's Endeca Navigation Engine, ProFind and InFront. Cabot Corp. uses the Endeca products for geospatial search and B2B catalog capabilities in InFront. ProFind integrates with existing security and authentication systems, categorization and auto-tagging products from third-parties.

Collier, Harry
Search Engines: Evolution and Diffusion, by Harry Collier and Stephen E. Arnold
21p. Infonortics, ltd. 02/01/2002
Web
https://www.infonortics.com/searchengines/search2.pdf
> Analysis and overview of search, innovations that have occured and what to expect, the market for search engines and the players, state-of-the-art in natual language searching.

Delphi Group
Taxonomy & Content; Classification Market Milestone Report
01/01/2002
> Detailed analysis of why taxonomy utilization is beneficial in managing a large corpus of information; description of the various methodologies for automating indexing and taxonomy production (Rules-based, Bayesian, Linguistic and Semantic, Support Vector Machine, Pattern Matching and Other Statistical Algorithms, Neural Networks).
>
> Defines how and why various search engines operate with and without taxonomy support. Analytical presentations on eleven competing products: Autonomy, Convera, Entopia, Mohomine, Quiver, Semio, Stratify, Textology, TopicalNet, Verity,Wherewithal.

Edelman, Russ
Making Sense of Search; Making the connections between disparate information is the next stage of search technology
1p. eDoc Magazine 05/01/2003
Web
http://edocmagazine.com/edoc_article_new.asp?ID=26583
> Positions visualization mapping as the next big thing in search technology.

Ewalt, David M.
Next Web; the Semantic Web, the next step in the Web's evolution, promises even more dramatic changes
4p. Information Week 10/14/2002
Web
http://www.informationweek.com/story/IWK20021010S0016

'To be accurate, the Semantic Web is an extension of today's Web rather than an entirely new one. Championed by the father of the World Wide Web, Tim Berners-Lee, it will probably take the form of specialized tags inserted inside HTML documents that don't just identify the page but also help computers understand what it's about."It's annotating any form of content, any type of data, with additional semantic relationships that are machine processable, so a machine can infer a little more about what's contained in that content," says Alexander Linden, director of emerging trends and technology at market-analysis firm Gartner.'

Hane, Paula J.
Focus on FAST
2p. NewsLink 01/02/2003
Web
http://www.infotoday.com/newslink/newslink0301.htm

"Most information professionals have a group of favorite search engines they tap on a regular basis, since they know that multiple resources are essential to a searcher's toolkit. My own favorites are dictated by my heavy concentration on breaking news, thus Google News and AlltheWeb.com's News Search are on the top of my list. I also use both of these engines for regular Web searching because of the size of their indexes and overall features and relevance...."

Paula J. Hane is news bureau chief for Information Today, Inc. and editor of NewsBreaks. Her e-mail address is phane@infotoday.com.

Levy, Steven
The World According to Google
5p. Newsweek 12/16/2002 New York

Reviews history of Google and influence it has on the ways in we search and work.

McCloskey, Paul
Knowledge Management Building Blocks, Tech Briefing
4p. FCW.COM 04/14/2003
Web
http://www.fcw.com/vendorsolutions/km/spec-building-04-14-03.asp

Cites several search and classification products with comments on the use of system integrators and consultants for creating classification schemes and building taxonomies.
